COVER LETTER

Reda, 29.05.2024r.

Invariant HR Department

Dear Invariant team,

Please, allow me to state 4 good reasons why you should consider hiring me as Junior Frontend Developer in your company.

1. I DEVELOP PROJECTS EFFECTIVELY AND WORK INDEPENDENTLY!

Development is an outlet for my creative energy. In my spare time, I work on my own project utilizing GODOT game engine and it's GDScript. (language syntactically similar to popular Python).

While working for Marotino.Inc, I was quickly entrusted by the lead developer in the company to contribute to it's flag project, the Menusso application. Building Menusso, I worked independently, delivering finished program features on time. Working on the project, I effectively identified tasks to be done, while also assessing their priority. Encountering unfamiliar technologies did not interfere with my work, as I utilized available documentation successfully.

2. I SPEAK ENGLISH VERY WELL, AND HAVE EXPERIENCE WORKING IN MULTINATIONAL ENVIROMENT.

I'll keep it simple, speaking English is a must if you work as a seaman! I believe you will have a hard time finding someone on the market with similarly rich experience with regards to working with people around the globe. I had the pleasure to work alongside citizens of countries such as The Netherlands, Germany, Great Britain, Spain, Italy, Philippines, Ukraine, Brazil, India, Bangladesh, or Saudi Arabia.

3. I CAN HANDLE PRESSURE.

Stress doesn't kill my mind and I had the displeasure of verifying it under most extreme of circumstances. My co-worker had a serious accident. Without hesitation, I stopped the ship, took care of his wounds and organised professional help, while other just spectated, frozen in their tracks. Thanks to my intervention and with a little bit of luck, my friend alive and doing well now.

4. I'M INQUISITIVE AND LIKE TO LEARN.

I'm not afraid of difficult tasks, requiring prior planning and research. I know how to do many things, from changing oil in diesel engine to playing piano. It's just in my nature that I get used to new environments quickly, benefiting those around me.

If by any chance I picked your interest in my candidature for the aforementioned position, I'll gladly answer any questions that you may have during an interview.

Best Regards,

Michał Żywicki
